Subject: University Terrace Apartments

Importance: High
Hello, Students!

We are announcing a change regarding the University Terrace Apartments for 2008-2009. We are informing you of this change as many of you are beginning to make plans regarding your housing choices during the lottery process. Next academic year, University Terrace Apartments will house three residents (triples) or four residents (quads) as originally designed.

This change increases the number of students who may select to reside in apartments in addition to providing more low-cost options. This is an exciting change as it will provide a larger capacity of housing for apartments allowing more students to select this living option. In addition, the triples are at a significant lower cost. The projected cost for a triple in 2008-2009 is \$4935 which is **an annual cost savings of \$945** in comparison to the price of a double.

If you have any questions, feel free to contact us!
